33. Tips, FAQ and troubleshooting

Screenshots in this guide use demo clients. Names and numbers are not real people.

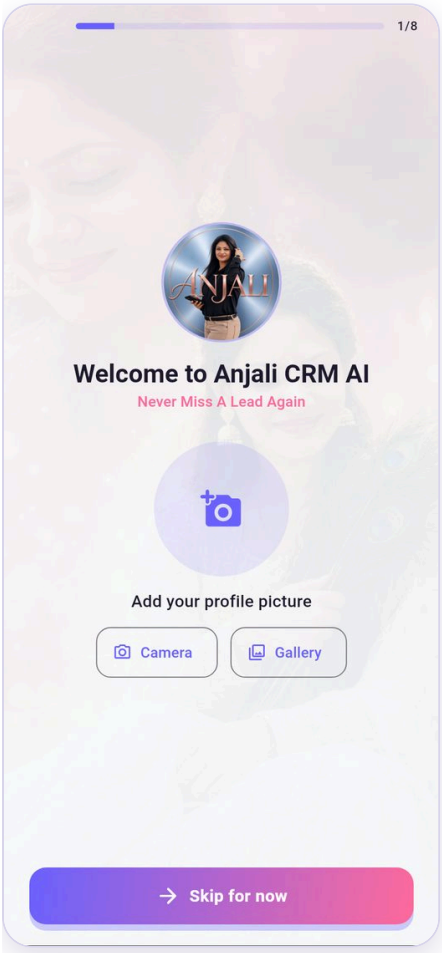

1. Installing the app

> The app is installed from an APK file (it is not on the Play Store). You only do this once; later versions install over the top and keep your data.

1. Open the APK download link you were given (GitHub → **Actions** → the latest green **Anjali CRM AI** run → **Artifacts** → `anjali-crm-ai-apk`). You must be signed in to GitHub to download it.
2. The download is a **.zip**. Open it in the **Files** app and extract the **.apk** inside.
3. Tap the **.apk**. If Android says installing is blocked, tap **Settings** and turn on **Allow from this source** for your Files app, then go back and tap **Install**.
4. If Google Play Protect shows a warning about an unknown developer, tap **More details → Install anyway**.
5. Open **Anjali CRM AI** from your app drawer.

Updating: install the newer APK the same way. Your clients, documents and settings stay on the phone. Take a backup first (Backup and restore) to be safe.

2. First-time setup

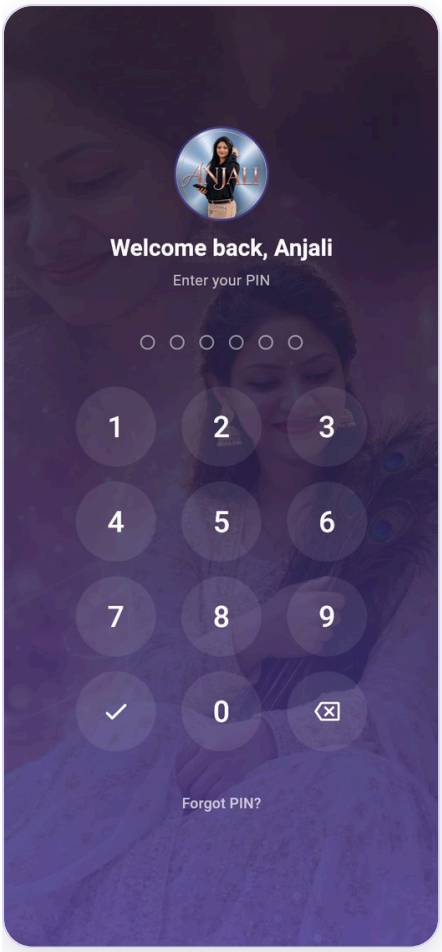

Setup wizard

> An 8-step wizard that runs the first time you open the app. The counter at the top shows your progress (for example **3/8**). Use the back arrow to go back a step.

1. **Profile picture** — tap `Camera` or `Gallery`, or `Skip for now`.
2. **What should we call you?** — enter your name, tap `Continue`.
3. **Your mobile number** — for example +971 50 123 4567.
4. **Choose your look** — `Light`, `Dark` or `Match my phone`.
5. **Create a 6-digit PIN**, then enter it again to confirm.
6. **Unlock with your fingerprint** — turn on `Enable biometric unlock` if your phone supports it.
7. **What do you sell?** — tick your products (Personal Loan, Business Loan, Mortgage, Credit Card, Auto Loan, Insurance) or tap `Add product`. At least one is required. Tick `Load sample data` to get 30 demo leads to practise with. Tap `Finish setup`.
8. **Save your recovery code** — tap `Copy` and keep it somewhere safe (not only on this phone). Tick `I have saved my recovery code` and tap `Let's go!`

> The recovery code is the **only** way back in if you forget your PIN. Write it down.

3. Unlocking the app

Lock screen

> The app locks when you leave it for longer than the auto-lock time (5 minutes by default) and every time it starts.

Option	What it does
PIN pad, ✓, ⌫	Enter your 6-digit PIN; ✓ confirms, ⌫ deletes a digit.
Fingerprint icon / **Biometric**	Unlock with fingerprint or face (if turned on).
Use pattern / **Use PIN**	Switch between pattern and PIN (only when pattern lock is set).
Forgot PIN?	Enter your recovery code (looks like K7QM-2XRP-H9TD), then choose a new PIN.

After too many wrong attempts the app shows **Too many attempts. Try again in mm:ss**. Failed attempts, and a photo of whoever tried, are recorded in the Security log.

After unlocking, a short **daily motivation** message may appear (if turned on). Tap the heart to close it and start your day.

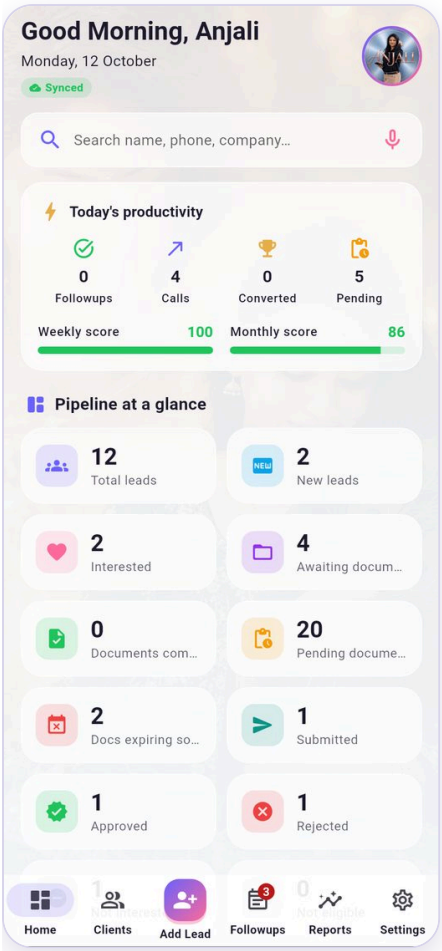

4. Finding your way around

The bar at the bottom of the screen has six tabs:

Tab	Use it to...
Home	See today's work, your pipeline and recommendations.
Clients	Browse, search, filter and sort all leads.
Add Lead	Add a new lead quickly.
Followups	See every followup by day. The red badge counts overdue ones.
Reports	Check performance and export Excel/PDF reports.
Settings	Profile, security, products, templates, backup and more.

Saving files from other apps: in WhatsApp, Gmail or Files, tap **Share → Anjali CRM AI** on a PDF, JPG, PNG or WEBP. The app asks **Choose the client to save this document**, then which folder to save it in. If the app was locked, the file waits until you unlock.

5. Home dashboard

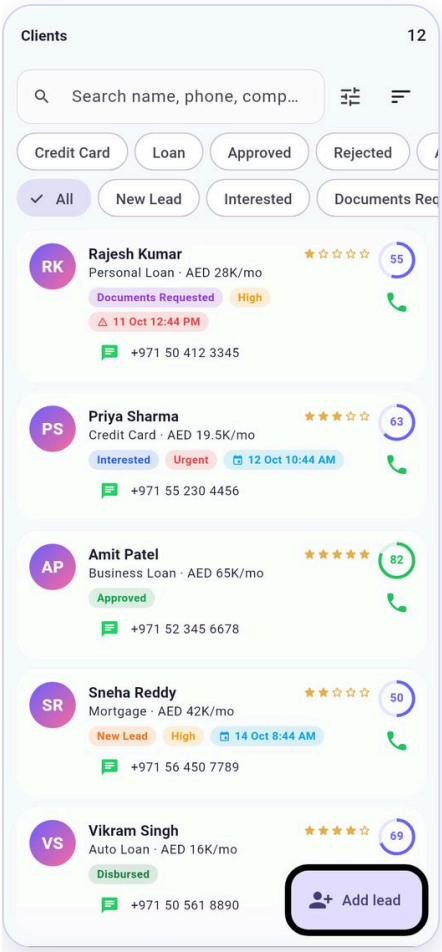

Home

> Your day at a glance. Most cards are tappable and open the matching list.

- **Header** — greeting, date and the **sync chip** (Synced / Pending Sync / Sync Failed). Tap your photo to open Settings.
- **Search bar** — *Search name, phone, company...*; the mic searches by voice.
- **Today's productivity** — Followups, Calls, Converted, Pending, plus weekly and monthly scores.
- **Pipeline at a glance** — Total leads, New leads, Interested, Awaiting documents, Documents completed, Pending documents, Docs expiring soon, Submitted, Approved, Rejected, Not interested, Not eligible, Followups today, Overdue, Conversions (month), Loan disbursed. Tap any card to see those clients.
- **AI recommendations** — best product and source, plus groups such as *Urgent followups*, *Pending document collection*, *Likely to convert*, *High priority*, *Waiting the longest*, *Upcoming opportunities*. Each row has WhatsApp and call buttons.
- **Today's tasks** — today's followups with call, WhatsApp and ✓ *Mark complete*. **All followups** opens the Followups tab.
- **Performance** — swipe through Lead funnel, Monthly performance, Product performance, Approval conversion rate and Status distribution charts.
- **Recent activity** — the latest things you did.

6. Clients list

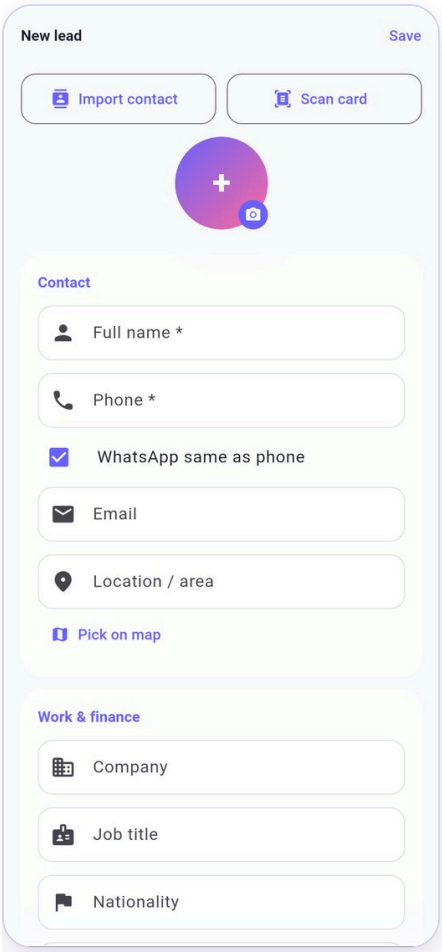

Clients

All your leads in one list, with fast filters. The number at the top right shows how many match.

Option	What it does
Search box	Search by name, phone or company. ✕ clears it.
Filters	Product, Priority, Monthly salary range (AED), Company and Location. **Apply** or **Clear**. A dot shows when filters are on.
Sort	Recently updated, Name A–Z, Lead score, Next followup.
Quick chips	Credit Card, Loan, Approved, Rejected, Awaiting Documents, Not Interested, Follow Up, Today, This Week, This Month. Tap again to turn off.
Status chips	**All** or one pipeline status.
Phone icon on a card	Call the client.
Swipe right / left	Right = WhatsApp, left = Edit.
Long press	Change the client's status.
+ Add lead	Open the new-lead form.

7. Adding and editing a lead

Add Lead

> Opened from **Add Lead**, **+ Add lead** or **Edit**. Only **Full name** and **Phone** are required.

Fast ways to fill it

- **Import contact** — pick someone from your phone book. If they have several numbers, choose the **Primary phone** and **WhatsApp number**.
- **Scan card** — read a business card with the camera (see Scanning a business card).
- Photo — tap the avatar, then **Camera** or **Gallery**.

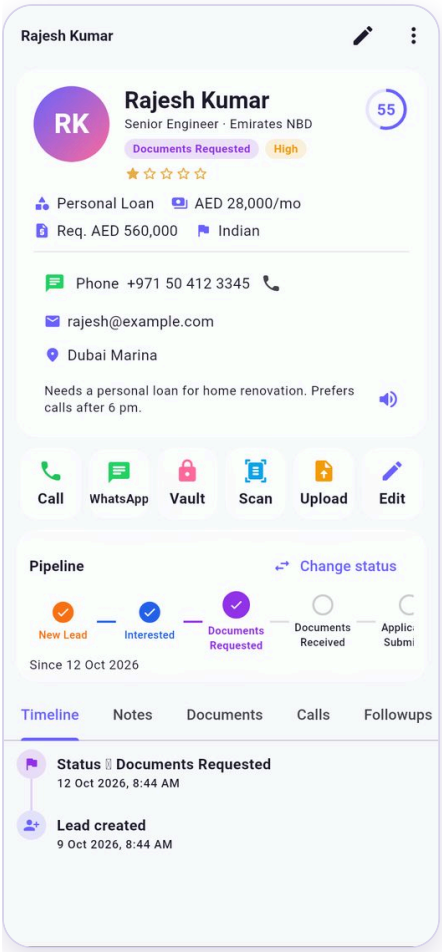

Fields

- **Contact:** Full name*, Phone*, *WhatsApp same as phone* (untick to type a different WhatsApp number), Email, Location / area, **Pick on map**.
- **Work & finance:** Company, Job title, Nationality, Monthly salary (AED), Requested amount (AED).
- **Lead:** Product, Lead source, Status, Priority, Rating (stars), **Schedule followup**, Remarks.

Tap **Save lead** (or **Save changes**). On the Add Lead tab, the eraser icon **Clear form** starts over.

Duplicates: if the phone number already exists, you'll see **Potential Duplicate Customer Found**: **Merge** into the existing record, **View Existing Record**, **Continue Anyway** or **Cancel**.

8. Client profile

Profile — Timeline tab

> Everything about one client: details, pipeline, history, notes, documents, calls, followups and files. Tap any client to open it.

Header

Name, job and company, status and priority, rating, the **lead score** (the circle), product, salary and requested/approved/disbursed amounts. Tap the phone icon to call, the WhatsApp icon to message, the email to write a mail, and the location to open the map. A speaker icon reads the remarks aloud.

Quick actions

Call	Dial the client; afterwards the app asks how the call went.
WhatsApp	Open the WhatsApp sheet (chat, templates, share details).
Vault	Jump to the Documents tab.
Scan	Scan paper documents with the camera.
Upload	Gallery (multi-select), PDF / Files app, or WhatsApp files.
Edit	Open the edit form.

Pipeline

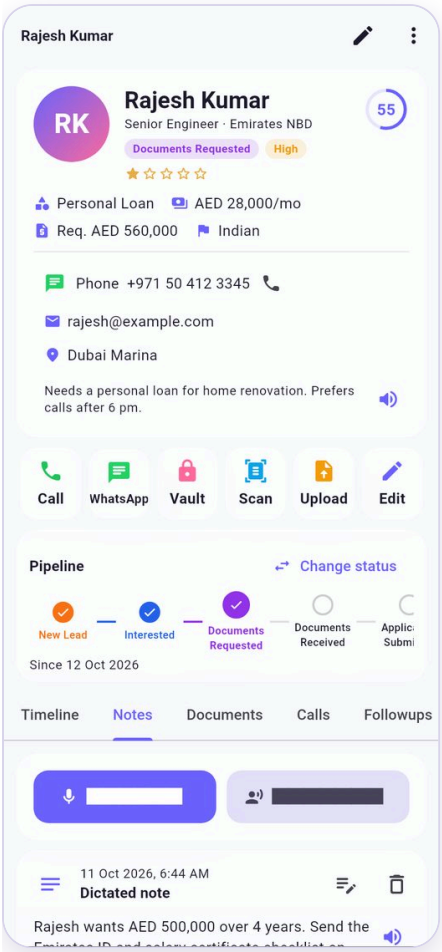

Shows where the lead is (New Lead → Interested → Documents Requested → Documents Received → Application Submitted → ...). Tap **Change status** to move it. For **Approved** and **Disbursed** you're asked for the amount in AED.

Menu (⋮)

Delete client removes the client and their followups. You can restore them from a backup.

The **Timeline** tab lists everything that happened with this client in date order: calls, status changes, uploaded documents, messages and notes.

9. Voice notes and dictation (Notes tab)

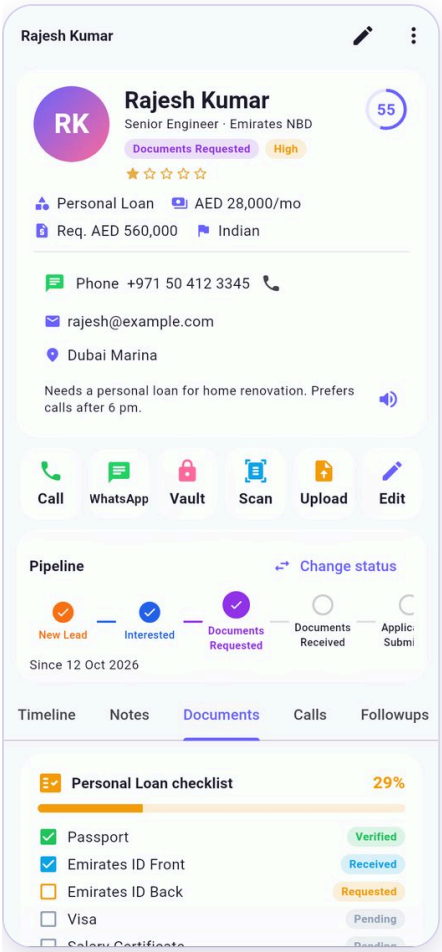

Profile — Notes tab

> Capture what the client said without typing.

- **Record** — records audio. While recording: **Pause** / **Resume**, **Discard** or **Save**.
- **Dictate** — speak and the app types it for you (*Listening…*). Then **Save** or **Discard**.
- On each note: ▶ play / pause, **Edit transcript** (or tap the text), and **Delete**.

> Dictation works offline on most phones once the language pack is downloaded in Google's speech settings.

10. Document vault (Documents tab)

Profile — Documents tab

> Every document for the client, stored **encrypted** on your phone and sorted into folders (Passport, Emirates ID Front/Back, Visa, Salary Certificate, Bank Statement, Credit Card Form, Loan Application Form, Company Trade License, Other Documents).

Checklist

The card at the top lists the documents the client's product needs, with a completion %. While it isn't complete you can tap **Mark missing as requested** or **Request on WhatsApp**, which sends the *Documents Required* template.

Adding documents

- **Scan** — scan pages, then **Save as one PDF** or **Save as images**.
- **Gallery** · **PDF / Files** · **From WhatsApp**.
- Choose **Save to which folder?**. For ID, passport, visa and trade licence you can enter the **expiry date** (or **Skip**).

Supported: PDF, JPG, PNG, WEBP.

Actions on a document (tap ⋮ on the row)

Action	What it does	Action	What it does
View	Open the preview.	Move to another category	Change the folder.
Rename	Give it a clear name.	Add note	Attach a short note.
Replace file / Attach file	Swap in a better copy, or attach one to an empty entry.	Mark as verified	Tick it off as checked.
Download	Save a normal (unencrypted) copy to the phone.	Change status…	Pending, Requested, Received, Verified, Rejected (asks why).
Share	Send via WhatsApp, email, etc.	Set expiry date	Track when it expires (shown on Home as *Docs expiring soon*).
Extract text (OCR)	Read text from an image; review it, then **Save to notes**.	Delete	Remove the document.

11. Viewing a document

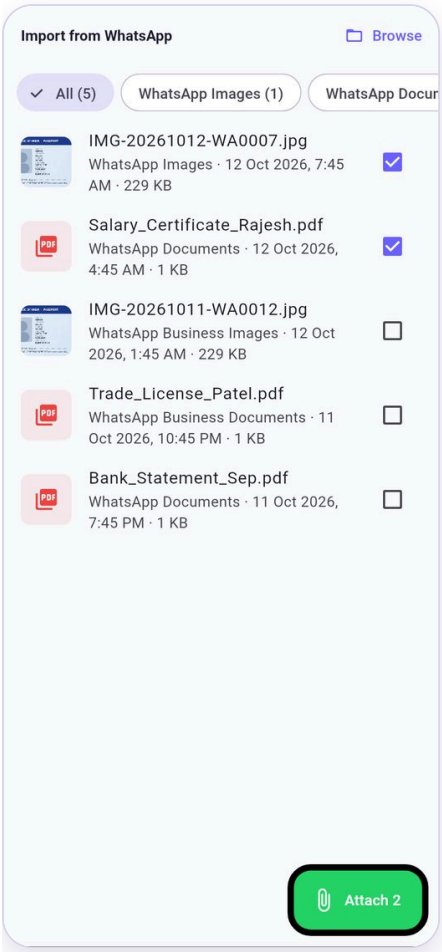

Document preview

> Opens instantly inside the app. The file is decrypted in memory only and is never saved unencrypted unless you choose Download or Share.

Button	What it does
Rotate	Turn the page 90°.
Zoom in / Zoom out	Enlarge or shrink (you can also pinch).
Fullscreen	Hide the bars. The small button at the bottom right exits fullscreen.
Share	Send the file to another app.
‹ Page X of Y ›	Move through the pages of a multi-page PDF.

12. Importing files from WhatsApp

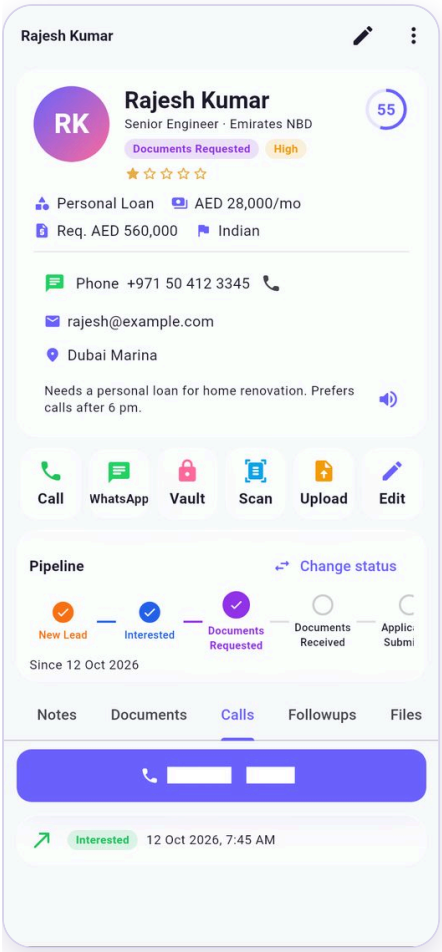

Import from WhatsApp

Attach documents a client sent you on WhatsApp or WhatsApp Business in a few taps. Open it from **Documents → From WhatsApp** or **Upload → WhatsApp files**.

1. Allow photo/storage access when asked.
2. Use the chips to filter: **All**, WhatsApp Images, WhatsApp Documents, WhatsApp Business Images, WhatsApp Business Documents. The newest files are shown first.
3. Tick one or more files, then tap **Attach N**.
4. Choose the folder (and expiry date if asked).

Can't see a PDF? Newer Android versions only let apps see WhatsApp *images*. Tap **Browse** to pick the PDF yourself, or in WhatsApp open the chat, long-press the file, and tap **Share → Anjali CRM AI**.

13. Calls, followups and files tabs

Profile — Calls tab

Calls

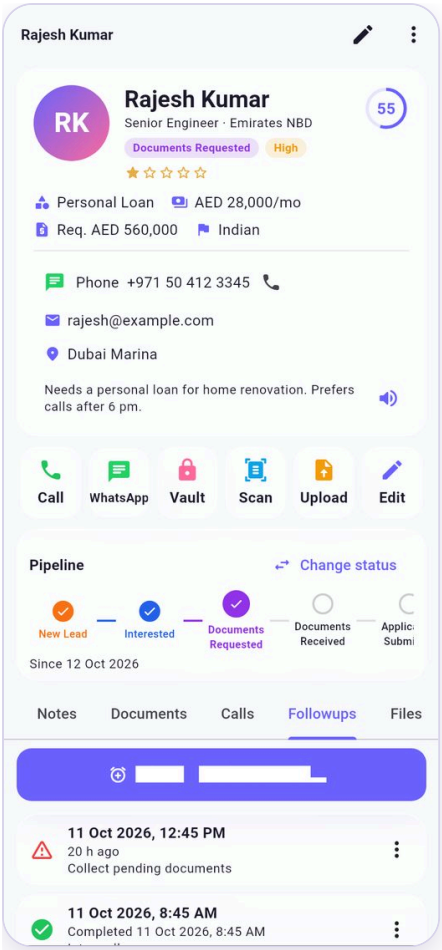

Call now dials the client. When you come back to the app it asks **How did the call with … go?** Pick an outcome, add optional notes, or **Skip**. Choosing *call back* asks when, and creates a followup. If a number was flagged as a **wrong number**, you're warned before calling.

Followups

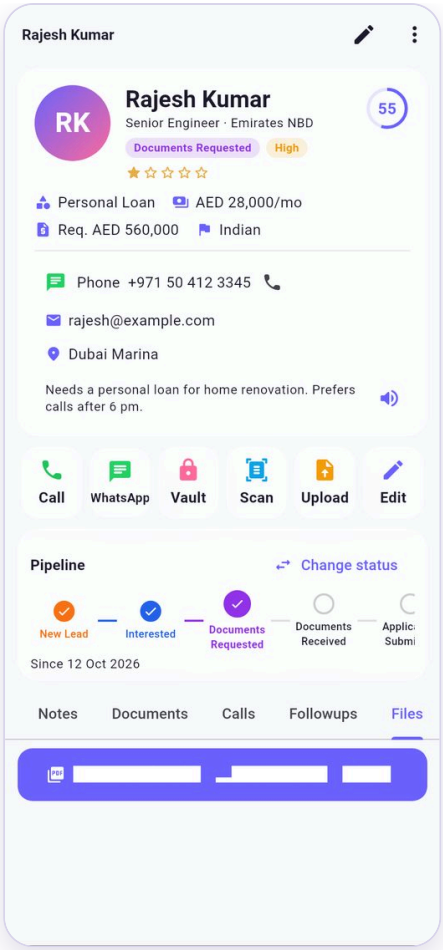

Add followup → choose date and time → optional note. Each followup's menu has **Mark complete** (with an optional outcome), **Reschedule** and **Delete**. Reminders arrive as notifications (see Notifications).

Files

Generate profile PDF creates a one-page summary of the client to share. Each file has **Open / share** and **Delete**.

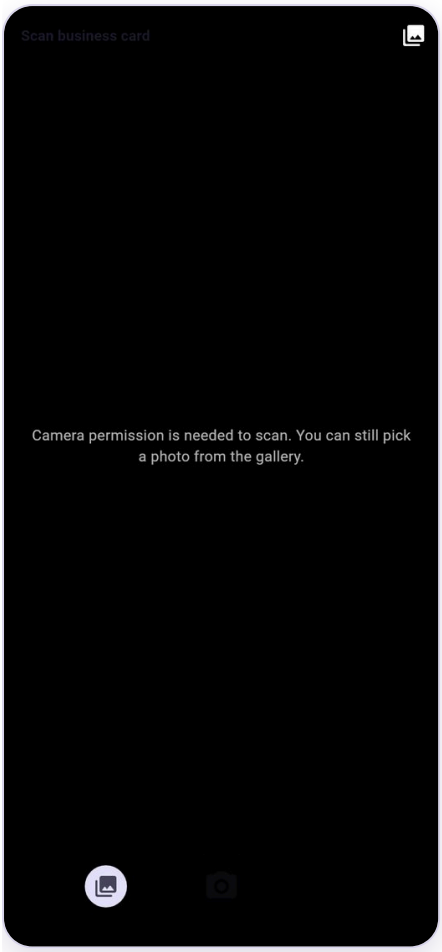

Profile — Followups tab

Profile — Files tab

14. Scanning a business card

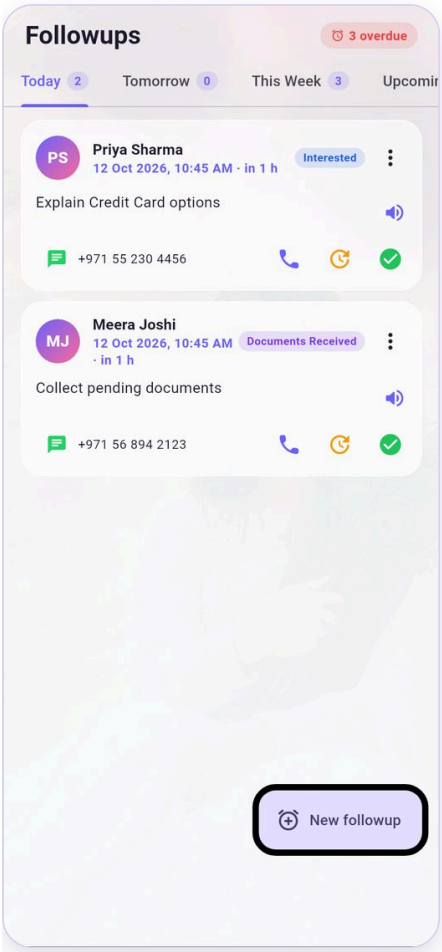

Shown until camera access is allowed

> Turn a visiting card into a new lead without typing. Open it from **Add Lead → Scan card**.

1. Allow camera access when asked (until you do, the screen shows the message pictured; you can still use **Gallery**).
2. Point the camera at the card and tap **Capture**, or tap **Gallery** to use a photo.
3. On **Review card**, check Name, Phone(s), Email, Company and Job title. Use **Add phone** for another number.
4. Tap **Use details** to fill the lead form, or **Retake**.

The text is read on your phone; nothing is uploaded. If nothing is found, try again in better light.

15. Followups

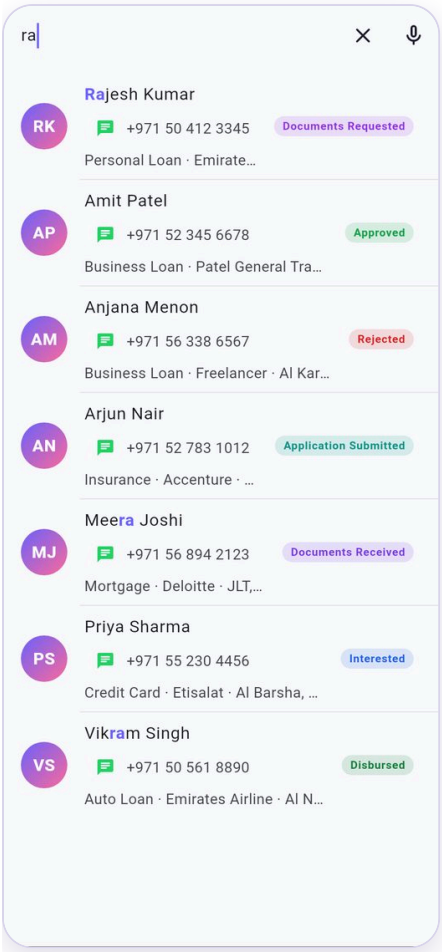

Followups

> Every followup across all clients, grouped so nothing is missed. A red pill shows how many are overdue.

- **Tabs:** Today, Tomorrow, This Week, Upcoming, Overdue, Completed.
- **On each card:** `Call`, `Reschedule`, `Mark complete` (optional outcome note). The menu has **Delete**, which also cancels its reminders.
- `+ New followup` → search and pick a client → date and time → optional note.

> You can also tick a followup off directly from **Home → Today's tasks**.

16. Search

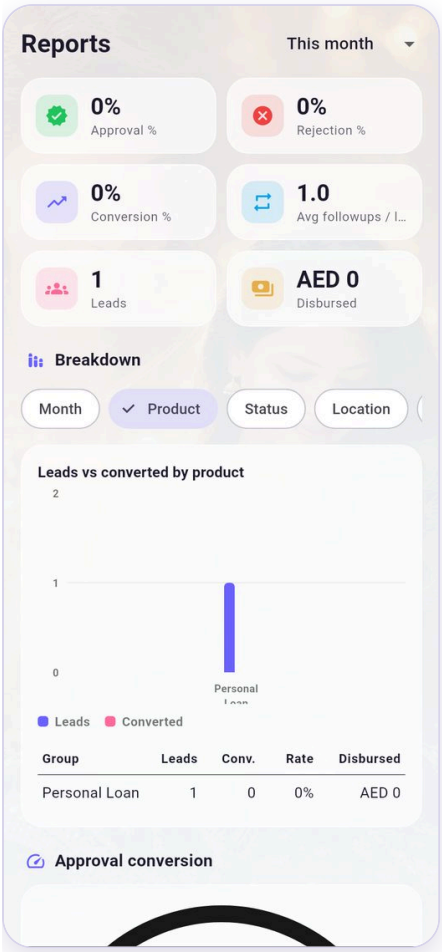

Search

> Find any client by name, phone number, company, location, product, status or salary (for example **15000**).

- Type in the box, or tap the mic for **Voice search**.
- **Recent searches** appear as chips; tap one to repeat it.
- Tap a result to open the client.

17. Reports

Reports

> How you are performing over any period.

- **Period** dropdown (top right): choose the time range.
- **KPIs:** Approval %, Rejection %, Conversion %, Avg followups / lead, Leads, Disbursed.
- **Breakdown:** pick a grouping chip (product, source, ...) to see Leads vs converted, with a table of Leads, Conv., Rate and Disbursed.
- **Approval conversion** gauge and **Lead source performance** table.
- **Export:** `Excel` (sheets: All Leads, Approved, Rejected, Documents Pending, Followups, Disbursed) or `PDF`.

18. Picking a location on the map

> Save where the client lives or works, so you can navigate there later. Open it from the lead form with **Pick on map**.

1. Tap the map or drag the pin. The latitude and longitude are shown.
2. `Current location` uses your phone's GPS. Turn on location if asked.
3. Tap `Use this` to save the point.

On the client profile, tap the location to open it in your maps app. **Remove pin** on the form clears it.

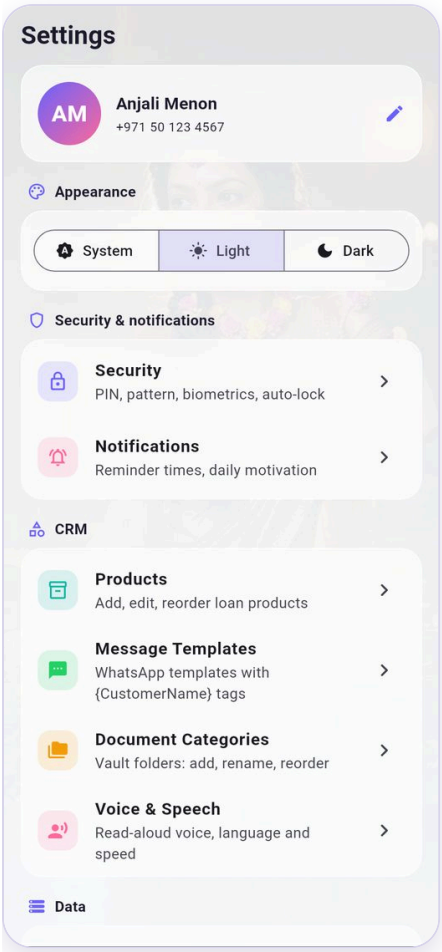

19. Messaging on WhatsApp and read-aloud

Tap any WhatsApp icon (or long-press it) to open the **WhatsApp · client name** sheet:

- `Open chat` — opens WhatsApp with the client.
- `Share client details` — send the client's details to someone else.
- **Templates** — tap a template (★ is your default). The message is filled in with the client's name, product and so on. Edit it in the **Message** box, then tap `Send on WhatsApp`.

Read aloud: the speaker buttons read text to you. Tap again to pause or resume, or long-press to stop. A mini player lets you change the **Speed**.

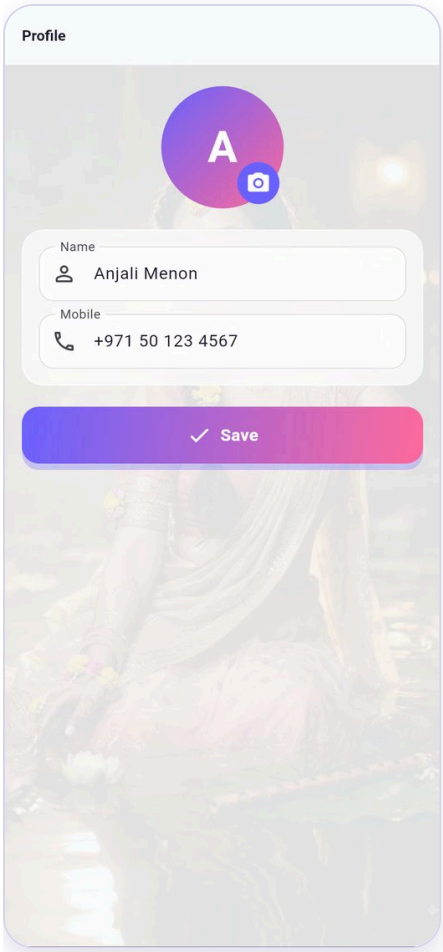

20. Settings

Settings

Item	What it's for
Profile card	Your name, mobile and photo.
Appearance	System, Light or Dark theme.
Security	PIN, pattern, biometrics, auto-lock.
Notifications	Reminder times, daily motivation.
Products	Add, edit and reorder the products you sell.
Message Templates	WhatsApp messages with {CustomerName} tags.
Document Categories	Vault folders: add, rename, reorder.
Voice & Speech	Read-aloud voice, language and speed.
Export data	Excel or PDF report.
Backup & restore	Local backups.
Cloud sync	Firebase sync status.
Sample data	Load or clear demo clients.
About	Version, licences, privacy.
Lock now	Lock the app immediately.

21. Your profile

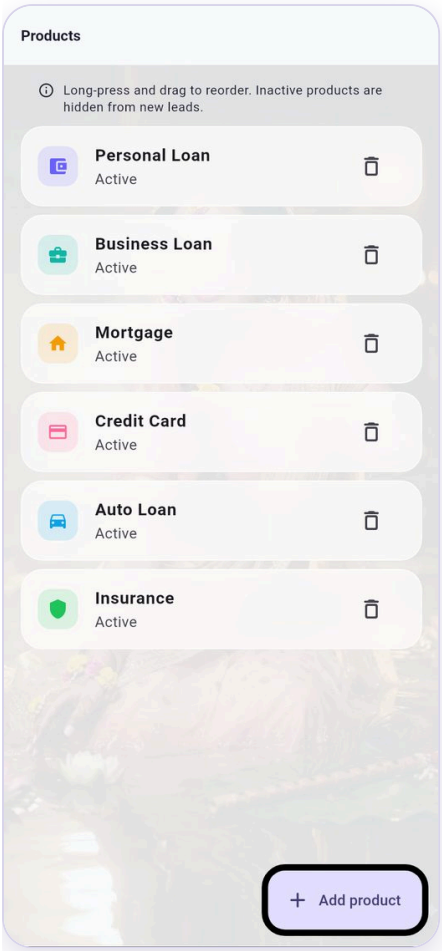

Profile

- Camera button on the photo: **Choose from gallery**, **Take a photo** or **Remove photo**.
- **Name** (required) and **Mobile** (optional).
- Save.

Your name appears on the lock screen, in greetings and as the sign-off in message templates.

22. Products

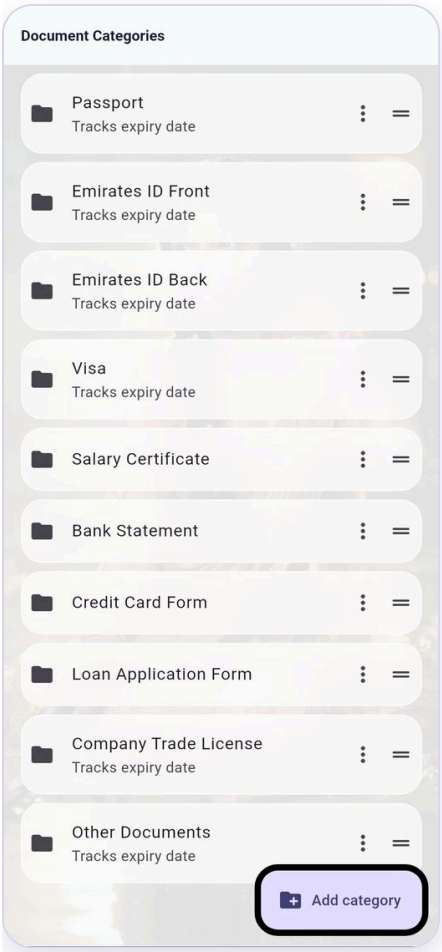

Products

> The products you sell and the documents each one needs. These drive the checklist on every client's Documents tab.

- **+ Add product** or tap a product to edit it: **Name**, **Icon**, **Colour**, **Required documents** (tap the folder chips to choose) and the **Active** switch.
- Long-press and drag to reorder.
- **Inactive** products are hidden for new leads but kept on existing clients. This is safer than deleting.
- The bin icon deletes a product (existing clients keep their records).

Default required documents — Loans and Mortgage: Passport, Emirates ID Front/Back, Visa, Salary Certificate, Bank Statement, Loan Application Form. Business Loan: Passport, Emirates ID Front/Back, Bank Statement, Company Trade License, Loan Application Form. Credit Card: as loans, but Credit Card Form instead of the loan form. Insurance: Passport, Emirates ID Front/Back.

23. Document categories

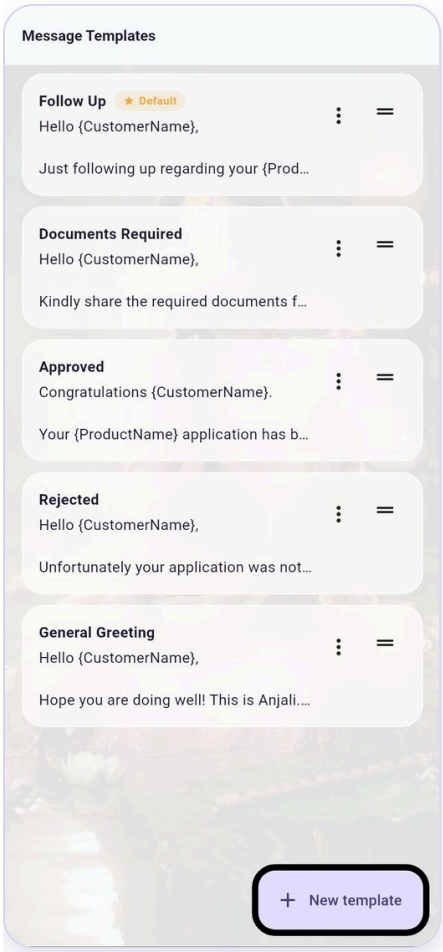

Document Categories

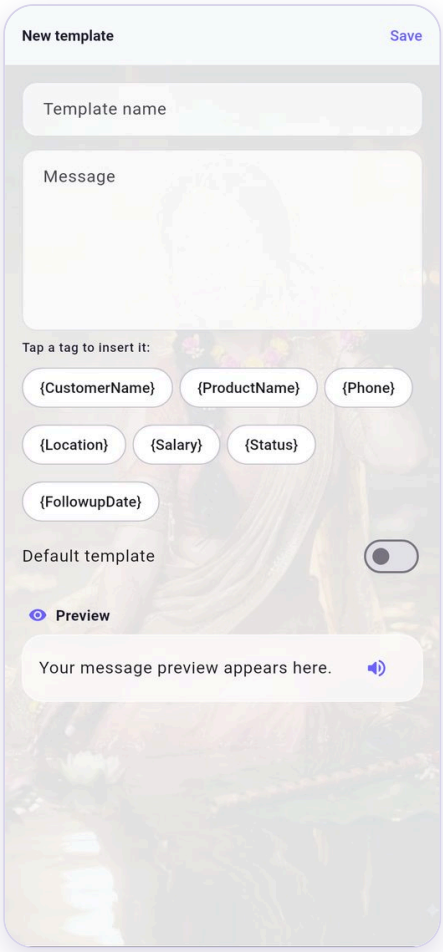

> The folders in every client's vault.

- **+ Add category** creates a folder.
- Drag the handle to reorder.
- Row menu: **Rename**, **Ask for expiry date** / **Stop asking for expiry**, and **Delete**.
- When you delete a folder its documents move to **Other Documents**. Nothing is deleted. Other Documents itself can't be removed.

24. Message templates

Message Templates

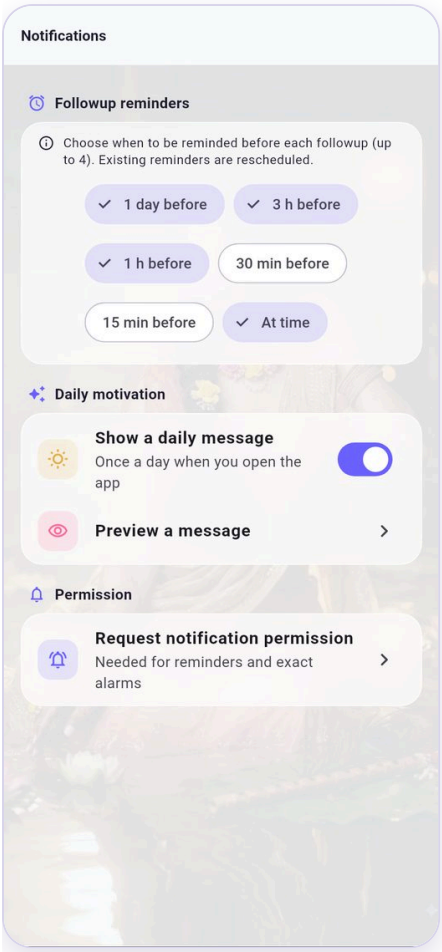

Template editor

> Ready-made WhatsApp messages. The app ships with: Follow Up (default), Documents Required, Approved, Rejected, General Greeting.

- **+ New template** or menu **Edit**: enter a **Template name** and the **Message**. *Tap a tag to insert it* (for example {CustomerName} or {ProductName}). The tags are replaced with the client's details when you send.
- **Default template** switch: the default is pre-selected in the WhatsApp sheet.
- **Preview** shows a sample with tags filled in, and can be read aloud.
- Menu: **Duplicate**, **Set as default**, **Delete**. Drag to reorder.

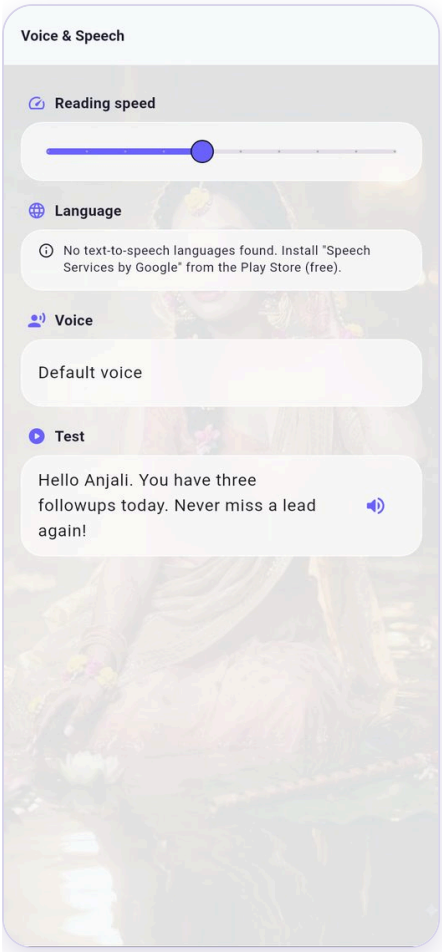

25. Notifications

Notifications

- **Followup reminders** — choose up to 4: 1 day before, 3 h before, 1 h before, 30 min before, 15 min before, At time. Existing reminders are updated automatically.
- **Daily motivation** — *Show a daily message* once a day when you open the app. *Preview a message* to see one now.
- **Request notification permission** — tap this if reminders don't appear (needed for reminders and exact alarms).

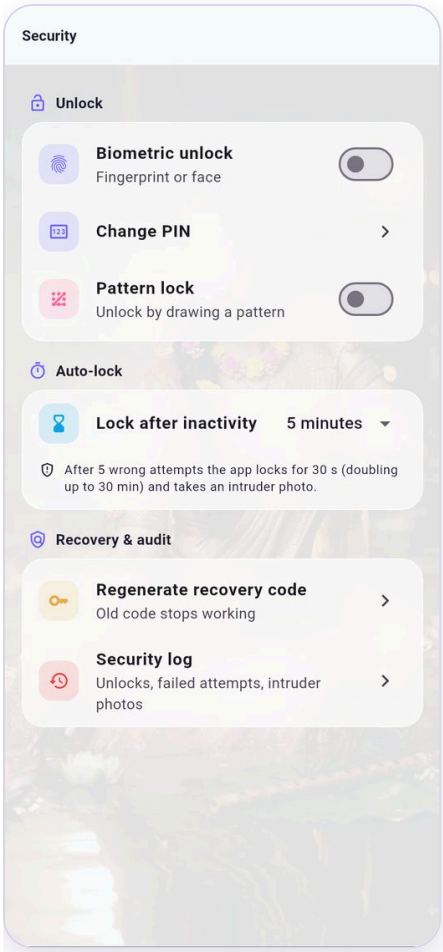

26. Voice and speech

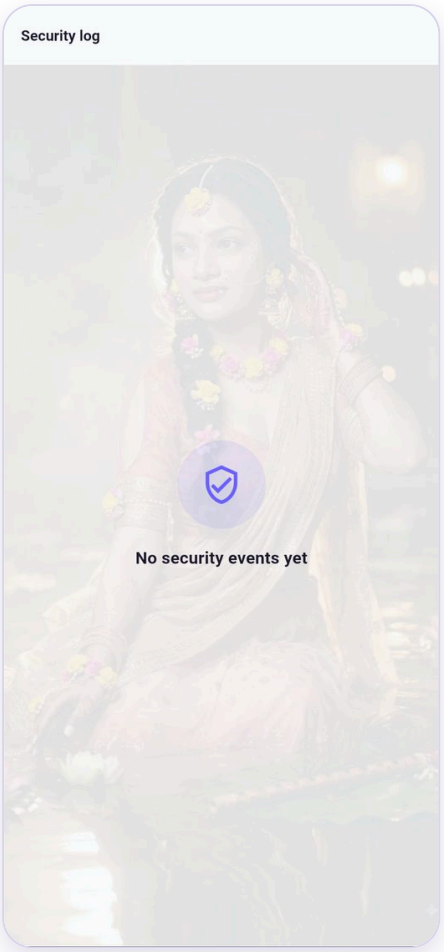

Voice & Speech

- **Reading speed** — slider from 0.2× to 2.0×.
- **Language** — or Device default. If none are listed, install *Speech Services by Google* from the Play Store (free).
- **Voice** — tap a voice to use it.
- **Test** — the speaker plays a sample sentence.

27. Security and security log

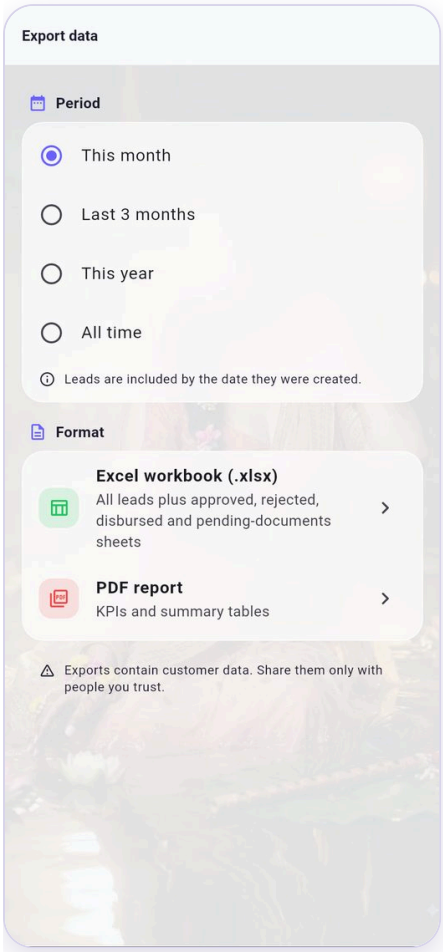

Security

Security log

- **Biometric unlock** — fingerprint or face.
- **Change PIN** — enter the current PIN, then the new one twice.
- **Pattern lock** — draw a pattern of at least 4 dots, twice. Asks for your PIN.
- **Lock after inactivity** — 1, 2, 5 (default), 10 or 30 minutes, or Never.
- **Regenerate recovery code** — makes a new code. The old one stops working at once. `Copy` it and tap `I saved it`.
- **Security log** — unlocks, failed attempts and **intruder photos** (tap one to see it full size).

28. Exporting data

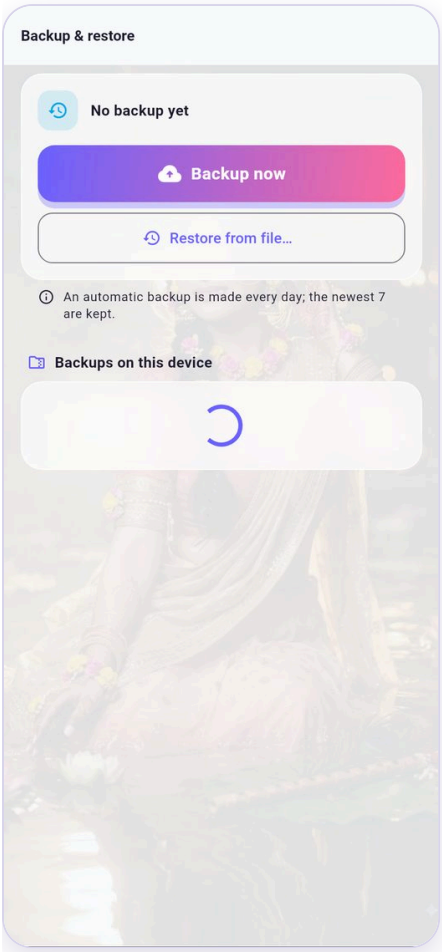

Export data

1. Choose the **Period**. Leads are included by the date they were created.
2. Choose the **Format**: **Excel workbook (.xlsx)** (all leads plus approved, rejected, disbursed and pending-documents sheets) or **PDF report** (KPIs and summary tables).
3. When it's ready, tap **Share** or **Save to device...**.

Exports contain customer data. Share them only with people you trust.

29. Backup and restore

Backup & restore

Protects you if the phone is lost, reset or replaced. A backup contains all clients, followups, notes, settings and documents.

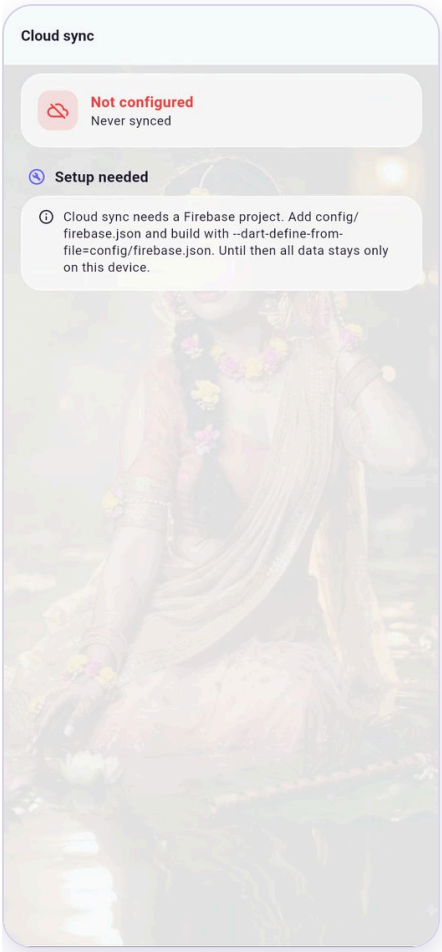

- **Backup now** — makes a backup immediately. An automatic backup is also made every day, and the newest ones are kept.
- Each backup's menu: **Restore**, **Share**, **Save to device…**, **Delete**.
- **Restore from file…** — pick a backup .zip (for example one saved to Google Drive).

Restore replaces all current data on this phone. Unlock the app first.

Moving to a new phone: on the old phone tap **Backup now**, then **Save to device…** or **Share** to Google Drive. On the new phone, install the app, finish setup, then **Restore from file…**.

The backup file contains customer documents in readable form. Keep it private.

30. Cloud sync

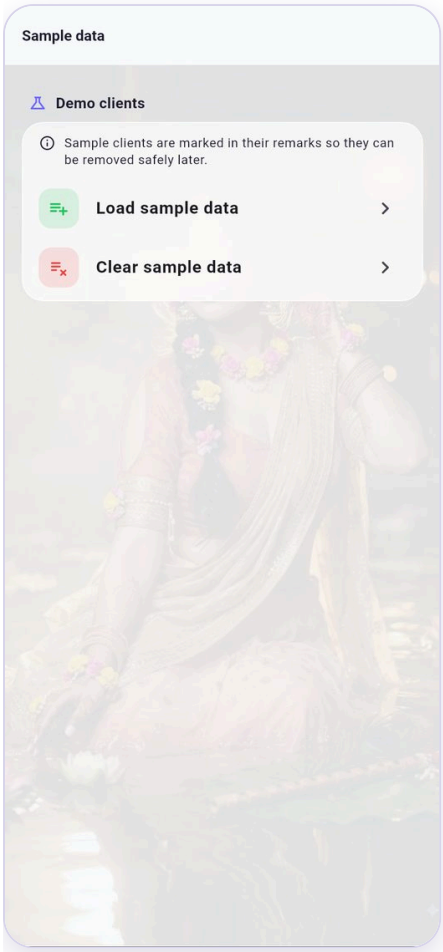

Cloud sync

> Optional. It copies your data and documents to **your own** Firebase project, so a second phone can stay in step. Without it, the app works fully offline.

- Status: Not configured, Turned off, Offline, Up to date, Syncing..., or Last sync failed.
- **Sync to cloud** switch and `Sync now`. The result shows how many items were pushed, pulled and uploaded.
- The chip on Home shows the same status. Tap it to retry.
- *Not configured* means this copy of the app was built without Firebase settings. Ask whoever built your APK.

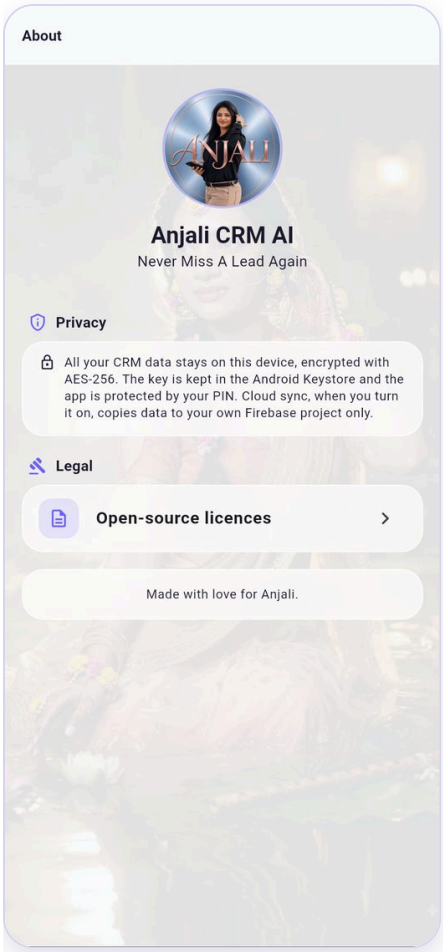

31. Sample data

Sample data

- **Load sample data** — adds demo clients, followups, calls and documents so you can practise.
- **Clear sample data** — removes only the demo clients and everything attached to them. Your real data is not touched.

32. About

About

Shows the version number (quote it when reporting a problem), the privacy statement and the open-source licences.

> **Privacy:** all CRM data stays on this device, encrypted with AES-256. The key is kept in the Android Keystore and the app is protected by your PIN. Cloud sync, when you turn it on, copies data to your own Firebase project only.

33. Tips, FAQ and troubleshooting

A daily routine that works

1. Unlock → check **Today's tasks** and **Overdue** on Home.
2. Call from the task list. After each call, pick the outcome so the timeline and score stay accurate.
3. Use **Request on WhatsApp** on the Documents tab for anything missing.
4. When documents arrive on WhatsApp: **Share → Anjali CRM AI**, then pick the client and folder.
5. Move the lead along with **Change status**, and schedule the next followup.

Problem	What to do
I forgot my PIN	Lock screen → **Forgot PIN?** → enter your recovery code → set a new PIN.
I lost the recovery code too	The data can't be opened without it (this protects your clients). Reinstall and restore from a backup file. Then go to Settings → Security → Regenerate recovery code and save the new one.
WhatsApp import shows no PDFs	Android 11 and newer hide WhatsApp PDFs from other apps. Use **Browse**, or Share the file from WhatsApp to Anjali CRM AI.
"Only PDF, JPG, PNG and WEBP files can be saved"	Ask the client to send a photo or PDF. Word and Excel files aren't stored in the vault.
Reminders don't arrive	Settings → Notifications → Request notification permission. Also allow the app in the phone's battery settings (no restriction).
Dictation or voice search doesn't work	Allow the microphone, and install or update *Speech Services by Google*.
Read-aloud has no voices	Install *Speech Services by Google*, then choose a language in Voice & Speech.
Sync chip says "Sync Failed"	Check the internet connection and tap the chip to retry. Your data stays safe on the phone either way.
"Unlock the app before restoring a backup"	The vault was locked. Unlock, then restore again.
A document says "Could not open"	The file may be damaged. Use **Replace file** to attach a fresh copy.
Phone lost or changed	Restore from your latest backup (keep a copy off the phone, for example on Google Drive). If cloud sync was on, sign in on the new phone and sync.

Works offline: everything except WhatsApp, cloud sync and maps works without internet. Business-card scanning and OCR run on the phone.
